Full Name | **Practice Type** | **Production Basis**

CONTINUATION | Months 13-24 automatically follow the first month on Page 1.

Month	Production $	Visits #	Days #	PPV $	Per Day $	Accept. %	Circumstances / Events

Enter production, visits, days, case acceptance and material events. PPV and production/day calculate automatically.

PRODUCTION TRACKER | TRAILING AVERAGES

DENTAL STRATEGIC | dentalstrategic.com

Full Name | **Practice Type** | **Production Basis**

Most recent completed months are used. Averages exclude months without production entries.

Window	Months	Production $	Visits #	Days #	PPV $	Per Day $	Accept. %	Avg Monthly $
Last 3								
Last 6								
Last 9								
Last 12								
Last 15								
Last 18								
Last 24								

METHOD: Production, visits and days are monthly averages. PPV = total production / total visits.

Production/day = total production / total clinical days. Acceptance = mean of entered monthly rates.

The monthly production average equals total production divided by the number of reported months.

If fewer months are available than the selected window, the Months column shows the actual sample size.
